SUMMARY

Final-year IT student at KMA seeking a Backend Developer Internship. Hands-on experience building web systems with Node.js, Express.js, MySQL, RESTful APIs, RBAC/ABAC, Excel import/export, and multi-level approval workflows. Developed an internal teaching workload management system with configurable business rules, workload calculation, contract generation, reporting, and PM2 deployment.

EDUCATION

Academy of Cryptography Techniques (Học viện Kỹ thuật Mật mã) 2021 - Present

Major: Information Technology

GPA: 2.9 / 4.0

PROJECTS

Academic Teaching Workload Management System 01/2025 - 08/2025

https://github.com/holyBeastt/ttcs.git

Role: Backend Developer | **Team Size:** 6 members

Key Contributions:

- Designed and implemented the Overtime Workload and Scientific Research modules end-to-end, covering database schema, APIs, and business rules.
- Aggregated data from multiple academic sources and applied configurable rules for overtime calculation and scientific-research offsetting.
- Took primary ownership of external-lecturer workflows, including approval flows, contract generation, and payment summaries.
- Enforced multi-level approval processes with RBAC/ABAC-based access control across faculties, the Academic Affairs Department, and the Finance Department.
- Deployed the application on an internal server using PM2; monitored logs and resolved runtime issues.

Demo: https://luuhoanglinh.id.vn/projects/twms

Tech Stack: Node.js, Express.js, MySQL, PM2

Online Learning Platform 08/2025 - 12/2025

https://github.com/holyBeastt/android_basic_app_server.git

Role: Backend Developer | **Team Size:** 3 members

Key Contributions:

- Designed a RESTful API for managing accounts, courses, lectures, and user permissions.
- Developed authentication mechanisms and access control for learning resources based on account roles.
- Implemented server-side mechanisms for protecting video lecture resources.
- Wrote technical documentation for the team.

SKILLS

Languages	JavaScript, HTML/CSS, SQL (MySQL)
Backend	Node.js, Express.js, RESTful API Design, Authentication & Authorization, RBAC/ABAC
Tools	PM2, Git, GitHub, Git Flow, Postman, AI-assisted development tools
