Luu Hoang Linh

Software Developer Intern

0964131543 luuhoanglinh.2003@gmail.com https://luuhoanglinh.id.vn Hanoi, Vietnam

SUMMARY

Final-year IT student looking for a Software Engineering Internship. I have hands-on experience with Node.js, MySQL, RESTful APIs, RBAC, and workflow-based features through academic team projects, including a KMA internal system that digitizes teaching workload declaration, approval, and reporting processes. I am interested in building practical software systems and improving my skills across backend development, databases, and application workflows.

EDUCATION

Academy of Cryptography Techniques (KMA) 2021 - 2026

Major: Information Technology

GPA: 2.86/4.0

PROJECT

Internal Teaching Workload Management System 10/2024 - present

https://github.com/holyBeastt/ttcs.git

Role: Fullstack Developer | **Team Size:** 6 members
Description: Developed an internal teaching workload management system to digitize workload declaration and approval processes for lecturers and departments including Training, Finance, and Administration. Added RBAC, Excel import/export, workload calculation, overtime tracking, contract generation, and reporting features.
Key Contributions:

- Implemented Excel import/export and automated workload-hour calculation based on teaching coefficients.
- Auto-generated Word contracts for guest lecturers and detailed Excel workload declarations for internal staff using docxtemplater and exceljs.
- Implemented a 3-level approval flow (Department → Training → Finance) to reduce data synchronization effort between departments.
- Deployed and managed the application on an internal server using PM2.

Tech Stack: Node.js (Express.js), EJS, MySQL, PM2

Online Learning Application 5/2025 - 12/2025

https://github.com/holyBeastt/flutter_basic_app.git

Role: Mobile Developer | **Team Size:** 3 members
Description: A Flutter app for managing online courses, where instructors upload content and students watch lectures and take quizzes.
Key Contributions:

- Contributed to user management features, including sign-up, login, and personalized course lists.
- Supported instructor tools on the web side for creating, editing, deleting, and uploading course materials.
- Worked on student learning features such as lecture viewing, quizzes, and progress tracking.
- Integrated security-related features including signed URLs, HTTPS communication, and screenshot/screen recording protection for course content.

Tech Stack: Flutter, Dart, Supabase

SKILLS

Languages	JavaScript, Dart, HTML/CSS, SQL.
Frameworks & Libraries	Express.js, React.js, Next.js, Bootstrap
Tools	RESTful APIs, RBAC, PM2, Git
