Luu Hoang Linh

Intern Backend Developer

0964131543 dev27012003@gmail.com https://github.com/linh404 Thai Nguyen

SUMMARY

Final-year Information Technology student at Academy of Cryptography Techniques (KMA) with a solid foundation in Node.js and MySQL. Gained practical experience by digitizing the internal teaching management workflow directly for my academy. Additionally, built a personal project to practice AI chatbot integration. Eager to learn, improve coding skills, and contribute as a Backend Developer Intern.

EDUCATION

Academy of Cryptography Techniques (KMA) 2021 - 2026

Major: Information Technology

GPA: 2.86/4.0

PROJECT

Internal Teaching Workload Management System 10/2024 - present

https://github.com/holyBeastt/ttcs.git

Role: Fullstack Developer | **Team Size:** 6 member | **Tech Stack:** Node.js (Express), EJS, MySQL
Developed an internal teaching task management system to support academic workflow for lecturers and staff, academic staff, and various departments (Training, Finance, Department Heads, and Admin). The system supports role-based access control, Excel data import, teaching workload declaration, standard workload processing, overtime tracking, contract generation, and report export (Word, Excel, images)
Key Contributions:

- **Workflow Support:** Built features to support the transition from paper-based to digital workload declaration for internal and guest lecturers.
- **Data & Calculation:** Handled Excel imports/exports for workload declarations and automated hour calculations based on teaching coefficients.
- **Document Processing:** Auto-generated Word contracts for guest lecturers and detailed Excel workload declarations for internal staff using docxtemplater and exceljs.
- **Approval Workflow:** Implemented a 3-level approval flow (Department → Training → Finance) to reduce data synchronization effort between departments.
- **Deployment:** Deployed the application on an internal testing server using PM2 for process management.

Coffee & Tea Ecommerce Management System -

https://github.com/linh404/backend-quantra-coffee.git

Role: Solo Developer (Learning Project) | **Tech Stack**: Next.js (Typescript), MySQL, Gemini API
Key Contributions:

- **API & Logic:** Designed and implemented RESTful APIs for product catalog, inventory, and order tracking using Next.js route handlers.
- **Authentication:** Implemented secure authentication flow and protected API routes using NextAuth and JWT.
- **AI Integration:** Integrated Gemini API to build a basic AI assistant for product Q&A.
- **Payment Flow:** Implemented checkout logic and integrated VNPay/MoMo in a sandbox environment to handle online transaction flows.

SKILL

Language	JavaScript, TypeScript, HTML/CSS, SQL.
Frameworks &Libraries	Express.js, React.js, Next.js, Bootstrap
Tool	Git, Postman, Gemini API, VNPay/MoMo Gateway
